DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Senior (US 6400836).

With respect to claim 1, Senior discloses an authentication and a input control information for an electronic device (see field on invention), acquiring at least two fingerprint images, (see col. 9, lines 48-52), computing image correlations between the acquired fingerprint images, (see col. 5, lines 64-68, the matching software calculates a correspondence between fingerprint i.e. a "correlation" takes place), extracting one contact parameter, calculated by the step of computing image correlations the contact parameter being determined between attributes in each fingerprint, (see col. 5, lines 50-67) and using fingerprint authenticate user and control electronic device, (see col. 3, lines 25-33) as claimed.

With respect to claims 2-6, he further discloses contract parameter is a rotation, translation, pitch and roll rotations, correlations of a single portion, and correlations between a multiplicity of small regions, (see col. 5, lines 32-67 and col. 6, lines 1-8) as claimed.

With respect to claims 7-9, he further discloses determining the rate of change of parameters rotation or translation to a reference position, measuring a pitch and roll rotation, reference position is the position which contact with the scanner is first registered, (see col. 4, lines 34-41, col. 6, lines 28-39) as claimed.

With respect to claim 10, he further discloses comparing successive, and possibly consecutive, images (see col. 9, lines 48-55) as claimed.

With respect to claim 11-13, he further discloses reference image, reference image is with known rotation information, and prompting the user to present finger, (see col. 8, lines 37-42, col. 9, lines 4-8) as claimed.

Claims 14-27 are rejected for the same reasons as set forth for the rejection of claims 1-13 because claims 14-27 are claiming similar subject matter as claimed in claims 1-13.

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art

under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome

either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

the reference was derived from the inventor of this application and is thus not the

invention "by another," or by an appropriate showing under 37 CFR 1.131.
